

## Case Study

## My City Centre, Al Barsha, Dubai

Solar Car Park | Shopping Center

### Project Highlights

- Grid-connected under DEWA's Shams Dubai Program
- Solar Car Park for shopping mall

**114.26** tons/year  
CO2 saved

**88,000** AED/year  
Electricity saved

**211** MWh/year  
Solar production

### Project Details

<b>Industry</b>	Shopping Centre
<b>Plant type</b>	Solar Car Park
<b>Capacity</b>	128kWp
<b>Location</b>	Al Barsha, Dubai
<b>Deployed</b>	Sept 2016

### Project Description

My City Centre Al Barsha is a popular focal point for the busy and thriving community of Al Barsha South and the neighborhoods within its vicinity. This successful neighbourhood shopping concept serves the everyday needs of the residents. Spread across 5,000 square metres of Gross Leasable Area, My City Centre Al Barsha is anchored by a Carrefour Market, hosts a selection of food and beverage outlets, and a selection of convenience shopping retailers.

Enerwhere deployed a customised solar car park system to the shopping centre in September 2016. The system is grid connected under DEWA's Shams Dubai Program and successfully producing since then.
