

# World Class Energy Storage For MENA

- Enstore's inverter and battery capacities are **customized** to meet your power and energy needs. Don't rely on pre-configured sizing from standard manufacturers.
- Plug and play solution
- Robust performance as Enstore is tailored for MENA environmental conditions, increasing **resiliency and system stability**.
- Enstore's team has **12MWh+** of storage implementation experience in MENA.
- Partnered with state of the art energy management system, Enlite, which allows you to **view and manage the performance** in real-time.
- Construction, Industrial, Oil & Gas off-grid sites can all benefit from Enstore.
- **3000 cycles warranty** from tier 1 battery manufacturer.

**Save on OPEX**

**Reduced diesel consumption**

**Power system stability**

**Remote monitoring and control**

## **100kW / 200kWh Enstore**

Provides a 100 kW of power and suitable for medium sized loads.

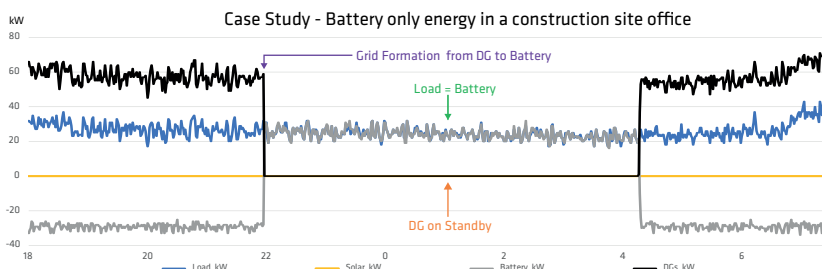

## **50kW / 50kWh Enstore**

Provides 50 kW of power and suitable for sites that have low night loads.

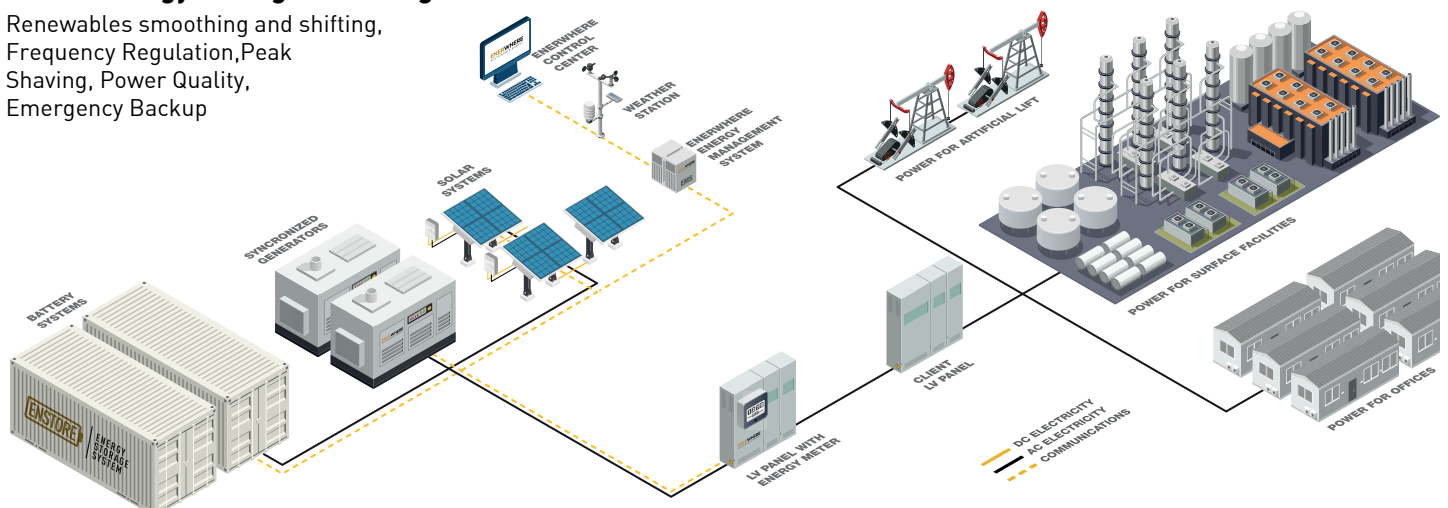

## **10kW / 30kWh Enstore**

Compact system that can be used for small loads.

## Use of Energy Storage in Microgrids

Renewables smoothing and shifting,  
Frequency Regulation, Peak  
Shaving, Power Quality,  
Emergency Backup
